Events of Unauthorised Distribution of Monitored Works

Reference: 10106 16784

Our system has determined multiple events of unauthorised distribution of which each one has been recorded in so called PCAP data file. Due to the complicated nature of the data presented in excerpts created from these PCAP files, all logs from certain IP address are listed herein to provide an overview of the extent of infringing activity from the IP address. PCAP files can be provided for expert analysis for each infringement.

Description of the columns:

#	Continuous numbering
Date and time	Time of communication. All time information is in UTC time.
IP Address	Address of the internet connection used for distribution
Port	The Transmission Control Protocol (TCP) port used for accepting connections and the TCP port used for distribution
Userhash	Unique random generated id of BitTorrent Software Client
Filehash	Unique Hash Value of Torrent File
Filename	Name of the distributed file
Client	The BitTorrent client used for distribution
Swarm Peers	Amount of users attached in the same swarm as the IP address during the same day
Total Peers	Total amount of users attached in one or more swarms distributing the same content during the same day
Verified by ISP	Whether internet service provider has verified the user of the IP address during the time of communication. Not all verifications have been recorded in our system if different verifications are results of multiple court motions.
